PRACTICAL-3

Problem statement :

Creating an Application in SalesForce.com using Apex programming Language.

Code:

```
public class LinearSearch {
   public static void demo(Integer key) {
      System.debug('Linear Search');

      Boolean found = false;
      List<Integer> lon = new List<Integer>();

      lon.add(3);
      lon.add(4);
      lon.add(5);
      lon.add(6);

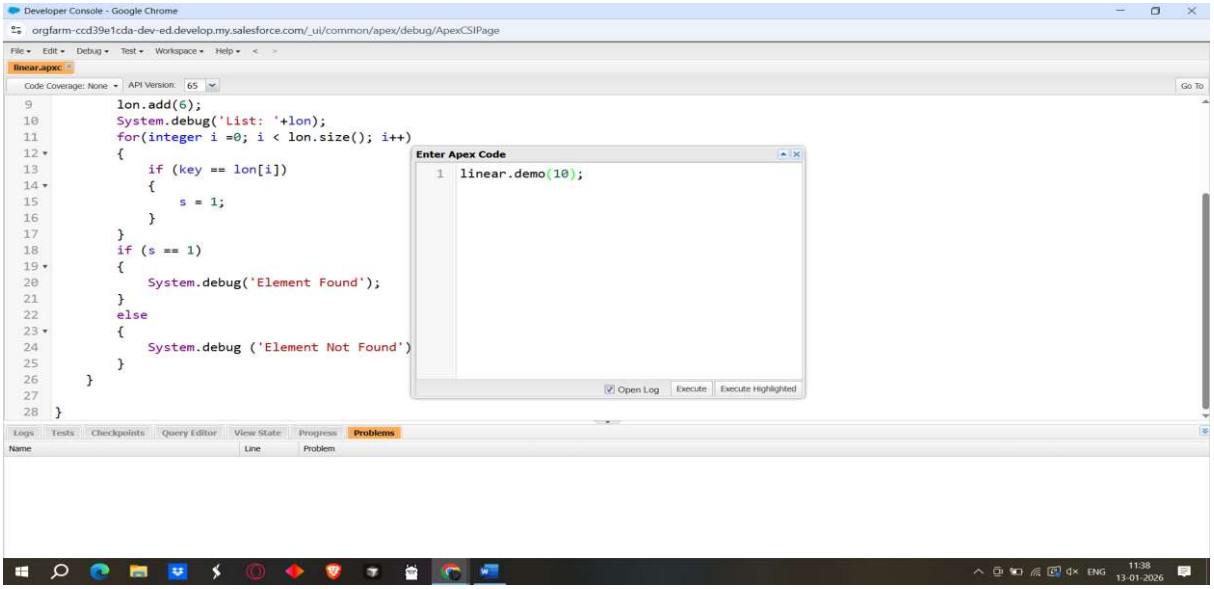
      System.debug('List: ' + lon);

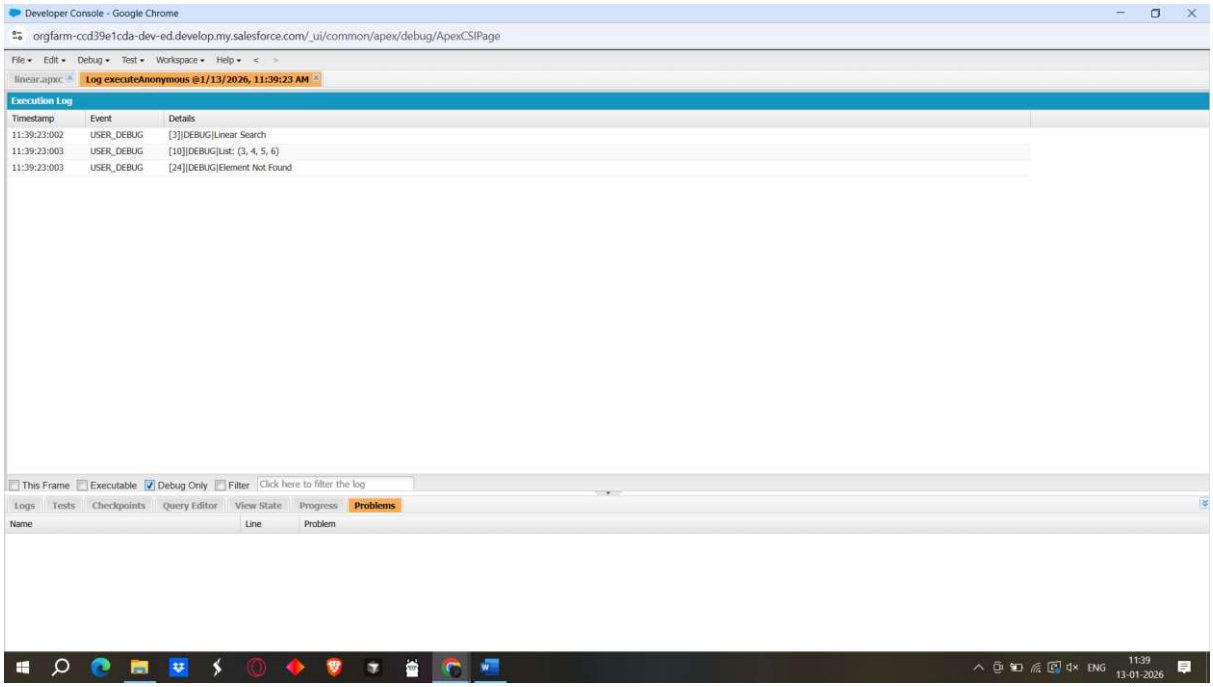
      for (Integer i = 0; i < lon.size(); i++) {
         if (key == lon[i]) {
            found = true;
            break;
         }
      }

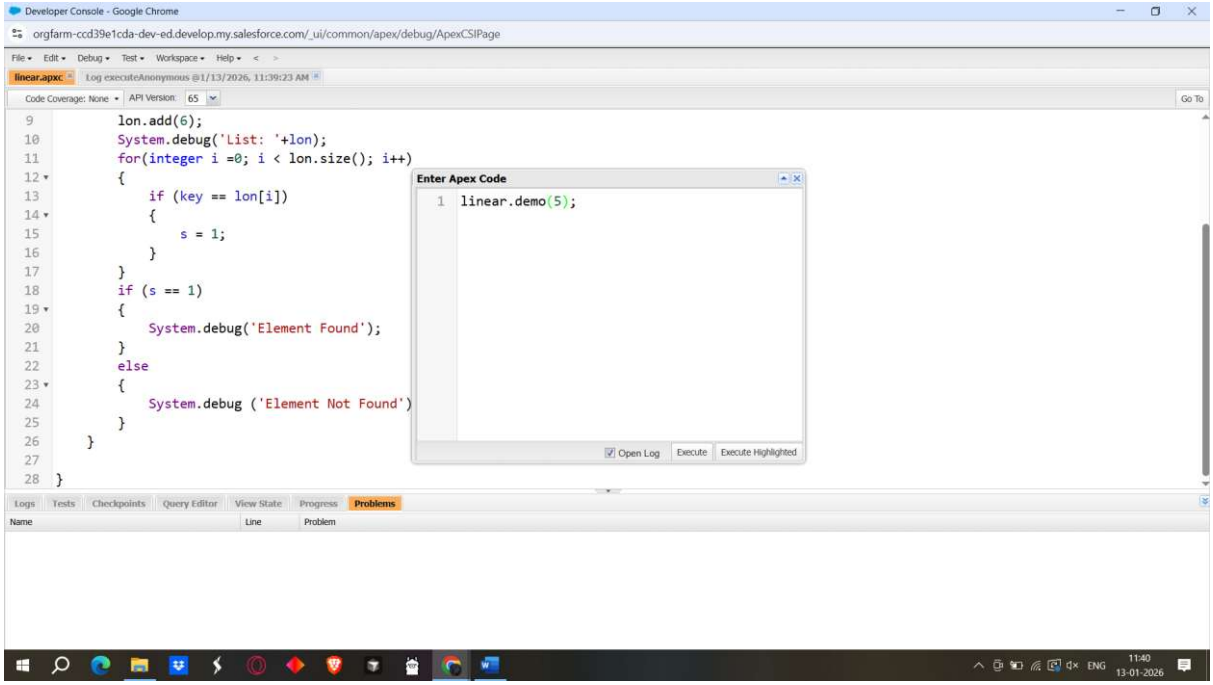
      if (found) {
         System.debug('Element Found');
      } else {
         System.debug('Element Not Found');
      }
   }
}
```

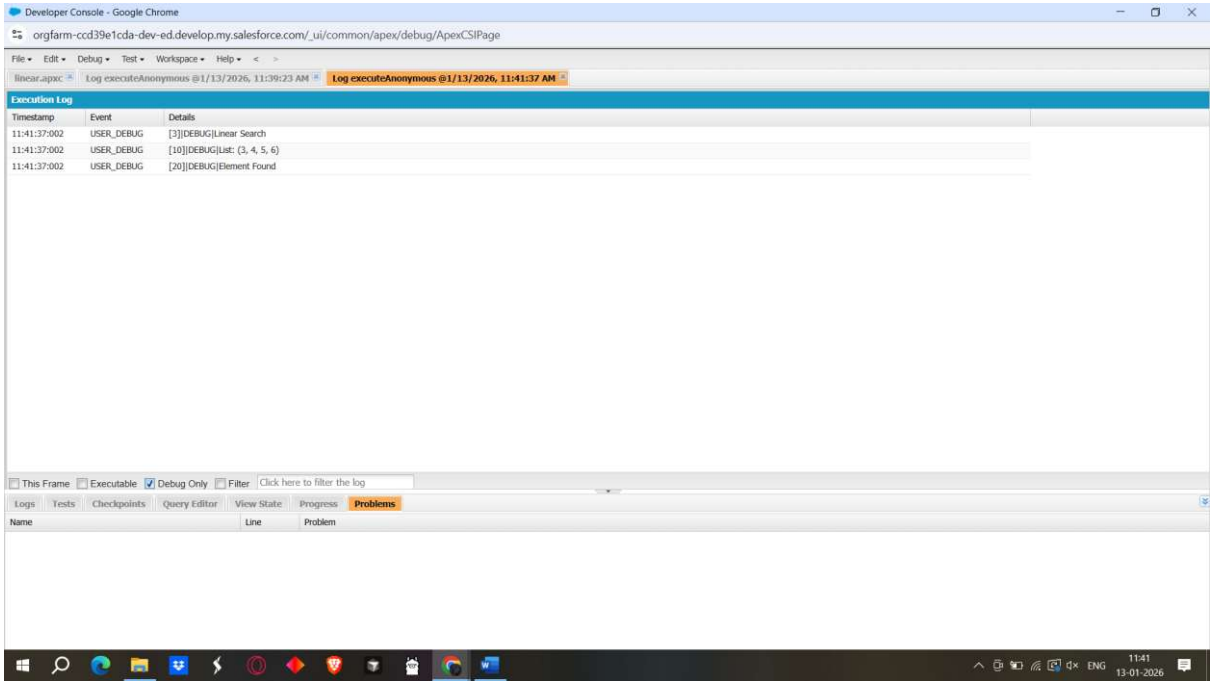
OUTPUT:

a) **When the input number is not found in given numbers:**









b) When the input number is found in given numbers:
