Develop an elementary chatbot for any suitable customer interaction application.

```
def chatbot():
    print("🤖 Chatbot: Hello! Welcome to ABC Restaurant.")
    print("Type 'bye' to exit.\n")

    while True:
        user = input("You: ").lower()

        if user == "bye":
            print("🤖 Chatbot: Thank you! Visit again 😊")
            break

        elif "menu" in user:
            print("🤖 Chatbot: We have pizza, burger, pasta, and drinks.")

        elif "price" in user:
            print("🤖 Chatbot: Prices start from ₹100.")

        elif "time" in user or "open" in user:
            print("🤖 Chatbot: We are open from 10 AM to 11 PM.")

        elif "order" in user:
            print("🤖 Chatbot: Please visit our counter or order online.")

        elif "location" in user:
            print("🤖 Chatbot: We are located near City Center.")
```

```
    else:
        print("🤖 Chatbot: Sorry, I didn't understand that.")

# Run chatbot
chatbot()
```

//OUTPUT
