Implement employee performance evaluation Expert System.

```
def employee_evaluation():
    print("👔 Employee Performance Evaluation System\n")
    name = input("Enter Employee Name: ")

    print("\nRate the following (1-10):")
    work = int(input("Work Quality: "))
    punctuality = int(input("Punctuality: "))
    teamwork = int(input("Teamwork: "))
    communication = int(input("Communication Skills: "))

    # Calculate average score
    avg = (work + punctuality + teamwork + communication) / 4

    print(f"\n📊 Average Score: {avg}")

    # Rule-based evaluation
    if avg >= 8:
        print(f"👉 {name} has Excellent Performance")
    elif avg >= 6:
        print(f"👉 {name} has Good Performance")
    elif avg >= 4:
        print(f"👉 {name} has Average Performance")
    else:
        print(f"👉 {name} Needs Improvement")

    # Additional expert suggestions
    if punctuality < 5:
        print("⚠️ Suggestion: Improve punctuality")
```

```
    if teamwork < 5:
        print("⚠️ Suggestion: Improve teamwork skills")
    if communication < 5:
        print("⚠️ Suggestion: Improve communication")

# Run system
employee_evaluation()
```

//OUTPUT
