Assignment - 4

Mayur Zope TE Comp A 71

Implement an application in Java Script using following: a) Design UI of application using HTML, CSS etc. b) Include Java script validation c) Use of prompt and alert window using Java Script

```
 // index.html
<!DOCTYPE html>
<html>
<head>
   <title>Student Registration</title>
   <link rel="stylesheet" href="style.css">
</head>

<body>

<div class="container">
   <h2>Student Registration Form</h2>

   <form onsubmit="return validateForm()">

      Full Name:
      <input type="text" id="name"><br>

      Class:
      <input type="text" id="class"><br>

      Department:
      <input type="text" id="dept"><br>

      Address:
      <textarea id="address"></textarea><br>

      Phone Number:
```

```
        <input type="text" id="phone"><br>

        Email ID:
        <input type="text" id="email"><br>

        <input type="submit" value="Submit">

    </form>

    <button onclick="welcomeUser()">Click for Welcome</button>
</div>

<script src="script.js"></script>

</body>
</html>
//style.css
body {
    font-family: Arial;
    background: linear-gradient(to right, #36d1dc, #5b86e5);
}

.container {
    width: 400px;
    margin: 80px auto;
    padding: 20px;
    background: white;
    border-radius: 10px;
    box-shadow: 0px 0px 10px gray;
    text-align: center;
}
```

```
h2 {
    color: darkblue;
}

input, textarea {
    width: 90%;
    padding: 8px;
    margin: 10px 0;
}

input[type="submit"], button {
    background: darkblue;
    color: white;
    border: none;
    padding: 10px;
    cursor: pointer;
}

input[type="submit"]:hover, button:hover {
    background: navy;
}

//script.js
function validateForm() {

    let name = document.getElementById("name").value.trim();
    let className = document.getElementById("class").value.trim();
    let dept = document.getElementById("dept").value.trim();
    let address = document.getElementById("address").value.trim();
    let phone = document.getElementById("phone").value.trim();
    let email = document.getElementById("email").value.trim();
```

```
    // 1. Mandatory field check
    if (name === "" || className === "" || dept === "" || address === "" || phone === "" || email === "")
{
        alert("All fields are mandatory!");
        return false;
    }

    // 2. Phone number validation (numbers only)
    let phonePattern = /^[0-9]+$/;

    if (!phonePattern.test(phone)) {
        alert("Phone number must contain only digits!");
        return false;
    }

    // 3. Email validation
    let emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;

    if (!emailPattern.test(email)) {
        alert("Enter valid email (example: abc@abc.com)");
        return false;
    }

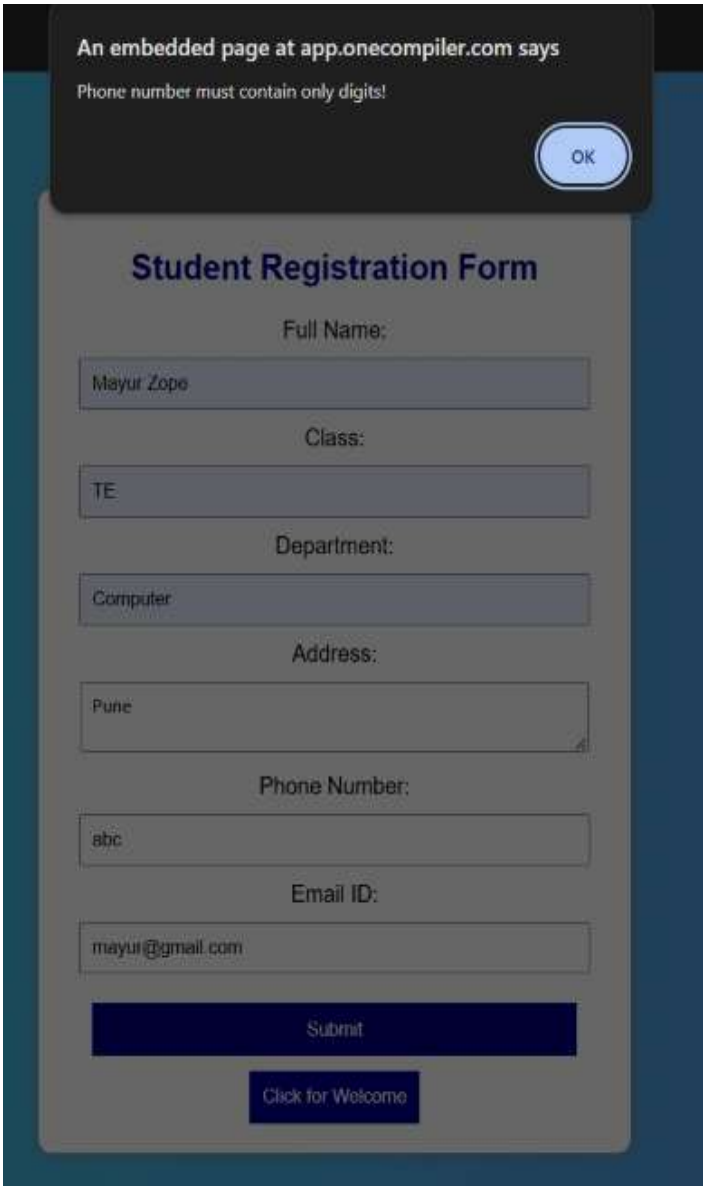
    alert("Form submitted successfully!");
    return true;
}

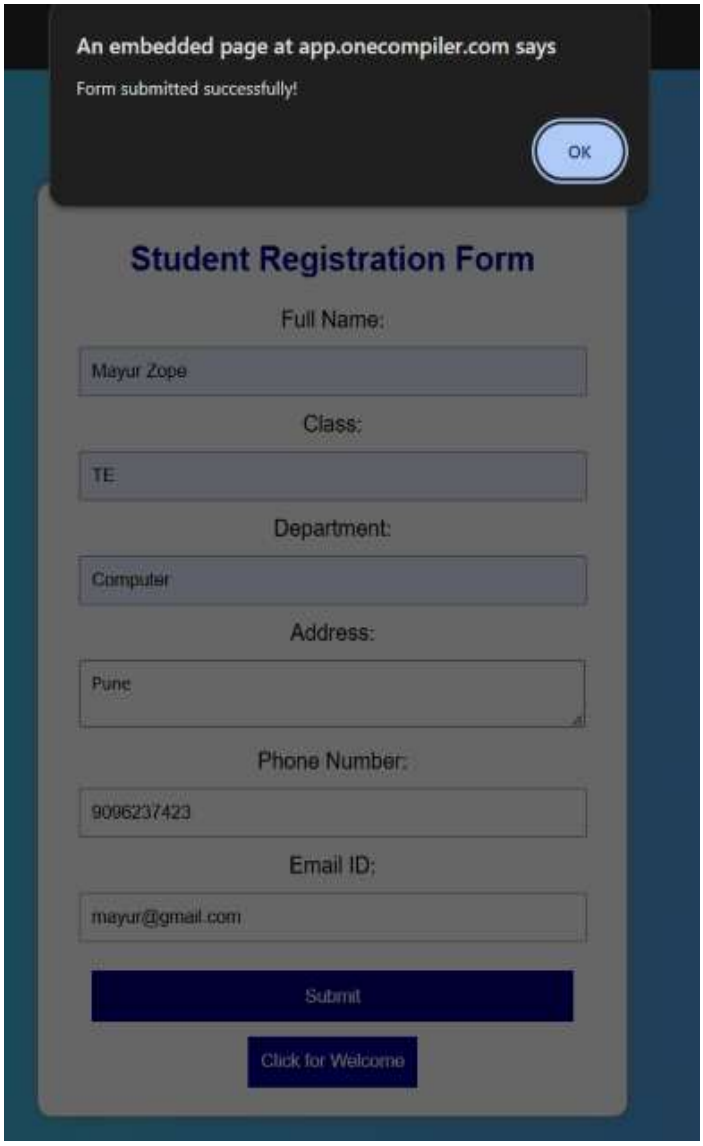
// Prompt + Alert
function welcomeUser() {
    let user = prompt("Enter your name:");

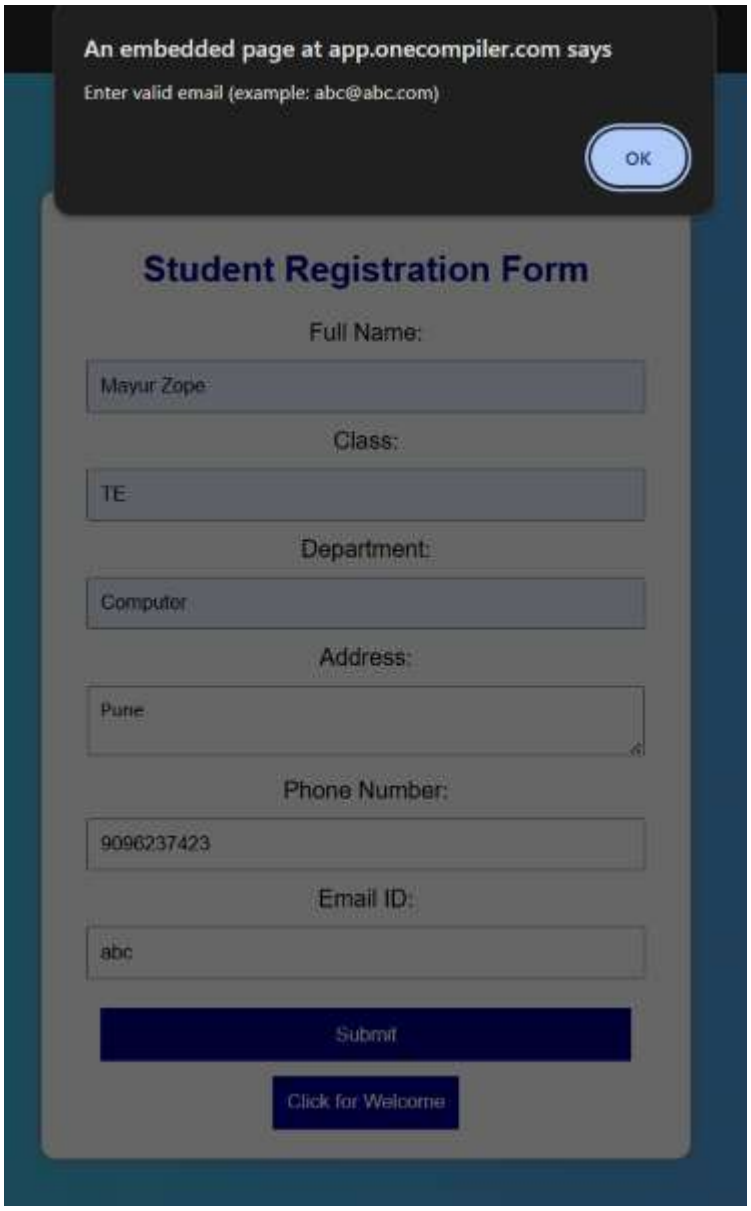
    if (user && user.trim() !== "") {
        alert("Welcome " + user + "!");
```

```
    } else {
        alert("Please enter a valid name!");
    }
}

// OUTPUT
```







An embedded page at app.onecompiler.com says
Enter valid email (example: abc@abc.com)
OK
